### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Benno Guggenheimer on 12 November 2010.

The application has been amended as follows (NOTE: Only amended claims listed below):

58. (currently amended) A computer program product [for use] stored on a terminal device, the computer program product comprising a computer program executed to render a page, comprising instructions for:

starting obtaining, over a network, a page made by a markup language in response to a user request for the page;

displaying text of the page in a first browsing mode which makes less rich presentation on a screen than a second browsing mode in which an external style sheet and an external script in the page are applied;

judging whether or not acquisition of the external style sheet and the external scrip is obtained from over the network; and

switching onscreen representation, depending on a result of the judging, from onscreen representation in the first browsing mode to onscreen representation in the second browsing mode.

67. (currently amended) The method according to claim [38] 20, further comprising:

storing information regarding a focus position and a scrolling position in the [first] text browsing mode; and

restoring the focus position and the scrolling position, based on the stored information, in [the second browsing] a mode in which the definition information is applied.

70. (currently amended) The method according to claim 67, wherein the restoring the focus position and the scrolling position is performed so that an item adjacent to the focus position to be restored is used as a focus target in the [second browsing] mode in which the definition information is applied if it is judged that a focus target in the [first] text browsing mode does not exist at a position to be restored in the [second browsing] mode in which the definition information is applied.

71. (currently amended) The method according to claim 67, wherein the onscreen representation in the [first] text browsing mode and the onscreen representation in the [second browsing] mode in which the definition information is applied are made on a same document described by a markup language of the page; and

wherein the information regarding the focus position and the scrolling position is stored in association with the same document.
